STEEL CEILINGS

CATALOGUE E-4

THE CANTON STEEL CEILING CO.
2820 Winfield Way, N. E.
Canton, Ohio

WHERE EVER YOU GO

Canton Line

STAMPED STEEL CEILINGS

Have stood the test of time and for years to come, will continue to prove their usefulness and ability to outlast ceilings of any other material or type.

THE SAFEST, MOST ECONOMICAL CEILING KNOWN

Adaptable to every room in the home, to Public Buildings, School, Church, Lodge Room, Club House. To every Store of every type. For your new Basement Recreation Room, the permanent ceiling.

STEEL CEILINGS

Never fall, never crack, never sag or warp.
Fire Retardent, Vermin Proof.

VIBRATION has no ill effect. ACQUSTICALLY Perfect.

ALWAYS SAFE

INSURE against LOSS of LIFE, INJURY, FIRE and REPAIR COSTS with

STEEL

TO YOU, MR. ERECTOR, add to your CUSTOMER LIST by demonstrating to YOUR PUBLIC the advantages of

CANTON

The Satisfaction Giving STEEL CEILING

THE CANTON STEEL CEILING CO.

2820 Winfield Way N. E.
Canton, Ohio

REPAIRING — ALTERING — MODERNIZING

Don't "SMUDGE" up your home, your stock of goods, your building, with lime dust resulting from removal or patching of plaster. Erect a MODERN STEEL CEILING directly over your present cracked, dangerous Plaster Ceiling.

NO DIRT — NO INCONVENIENCE

KNOW SATISFACTION from the first tap of the hammer in its erection, through the life of your building.

FOR NEW WORK

Of course you'll use STEEL CEILING for

SAFETY — ECONOMY

The Longest Life Ceiling Known

Subject to any Decorative Scheme.
Paint adheres—never chips or flakes.

A FIRE TEST

to determine the comparative fire resisting qualities of

Steel Ceilings and Plaster Ceilings

conducted by

Columbia University, New York City

showed the following:

(Plaster Ceiling on Wood Lath)	**After 12 minutes** the ceiling was burned through, the lath and plaster was falling.
	After 20 minutes the lath and plaster was practically all down and the beams were burning rapidly.
(Metal Ceiling on Wood Furring)	**After 15 minutes** flames were issuing from joints of the metal.
	After 20 minutes the metal sheets were curling away from beams.
	After 45 minutes flames were issuing from metal joints. It was evident that the beams were burning freely.

Over Twice the Margin of Safety for Steel

Directions for Ordering Metal Ceilings

Most of our customers now list and order material required for their work, but if we are called upon to prepare working drawings, it is absolutely necessary that accurate information be given in regard to the size and shape of room to be ceiled.

We prefer to have a diagram or sketch of the room, showing all angles and offsets, such as chimneys, skylight openings, girders, beams, posts, etc. Be especially careful to give the exact measurements of all sides of room and the location and size of all offsets, openings, etc. If any beams project below ceiling, locate same and give size of the face and the depth, and state whether wood or iron. Subdivided measurements should always equal total measurements of length or width of room.

Give the size of Cornice to be used and state whether same can be used on all sides of the room, or if a smaller Cornice or Mould is to be used across openings or windows that extend to the ceiling.

Designate plainly spaces that are **not** to be ceiled with metal.

Too much care cannot be exercised in furnishing proper dimensions and correct information in regard to Ceiling wanted. Measurements once planned to a design and afterwards changed, will in most cases work a hardship in the erection.

If the Side Walls are to be covered, give the height of walls and measurements of all openings and offsets.

Be sure to indicate preference as to design for both Ceiling and Walls, and if possible give preference of a second and third choice. If left to our judgment we will furnish what we think should be appropriate, taking into consideration the size and shape of rooms and the kind of occupancy.

An effective treatment, with a "Canton Line" Steel Ceiling, in the Living Room of a modern home. **Plate No. 305.**
Erected over an old, cracked, plaster ceiling. No dirt. No inconvenience.
A ceiling that will last as long as the building.

TELEGRAPHIC CODE
Instructions for Use

To simplify and reduce the expense of handling telegraphic inquiries and orders requiring the use of more than ten words, the following private code has been adopted and will hereafter be used by this company.

In transmitting messages to the Telegraph Company it is recommended that all code words be typewritten or printed to avoid mis-spelling and consequent errors. Many code words are very similar, but have different meanings.

All telegraphic inquiries and orders should be confirmed by letter the same day they are sent, and plainly marked "CONFIRMATION" to avoid error and duplication. We will not hold ourselves responsible for the duplication of any telegraphic order, the confirmation of which is not marked in this manner.

When wiring us about an order always give our order number, or your number, date or items called for, so we can identify same without difficulty.

All shipping promises are computed from the day the order reaches this office, not including the day of receipt. We assume no responsibility for failure to fulfill shipping promises, due to causes beyond our control.

Telegraphic Code Words are shown in Italics, beneath illustrations.

General Telegraphic Code

Vacant—Ship at once by freight
Vacation—Ship at once by express
Vaccine—Enter order and advise shipping date
Vacillate—Enter order and ship to
Vacuity—Advise by wire how soon you can ship
Vacuum—Ship by freight as soon as possible
Vagabond—We can ship
Vagary—Can ship on receipt of order
Vagrant—Ship in carload
Vague—Have you shipped order _____?
Vail—When will order _____ be shipped?
Vain—We have shipped your order_____
Valance—Expect to make shipment order_____
Valentine—Duplicate our order_____
Valet—Change our order _____
Valid—Hold for instruction order
Valise—We have all in stock except
Valley—Shall we ship what we have ready?
Valor—Order_____not as yet received; kindly trace shipment
Value—Ship what you have ready and let balance follow as soon as possible
Valve—Wire reply
Vamp—Answer by first mail
Vandal—See letter mailed today
Vandyke—We replied to your letter
Vane—Order unavoidably delayed; expect to ship about
Vanity—Quote best price and shipping date
Vantage—Your wire transmitted incorrectly; please repeat
Vapid—We will have to construct specially
Vapor—Wire our cost F. O. B. Canton
Variance—Wire our cost F. O. B. Canton freight allowed
Variety—Your cost cars factory
Varlet—Your cost cars factory freight allowed
Vagsal—Expected remittance not received; advise by wire when you will mail same
Varicide—Your order number _____ held pending credit information, send data concerning account

USE THIS CODE FOR FIGURES

Make combination using code for each digit in the number.
